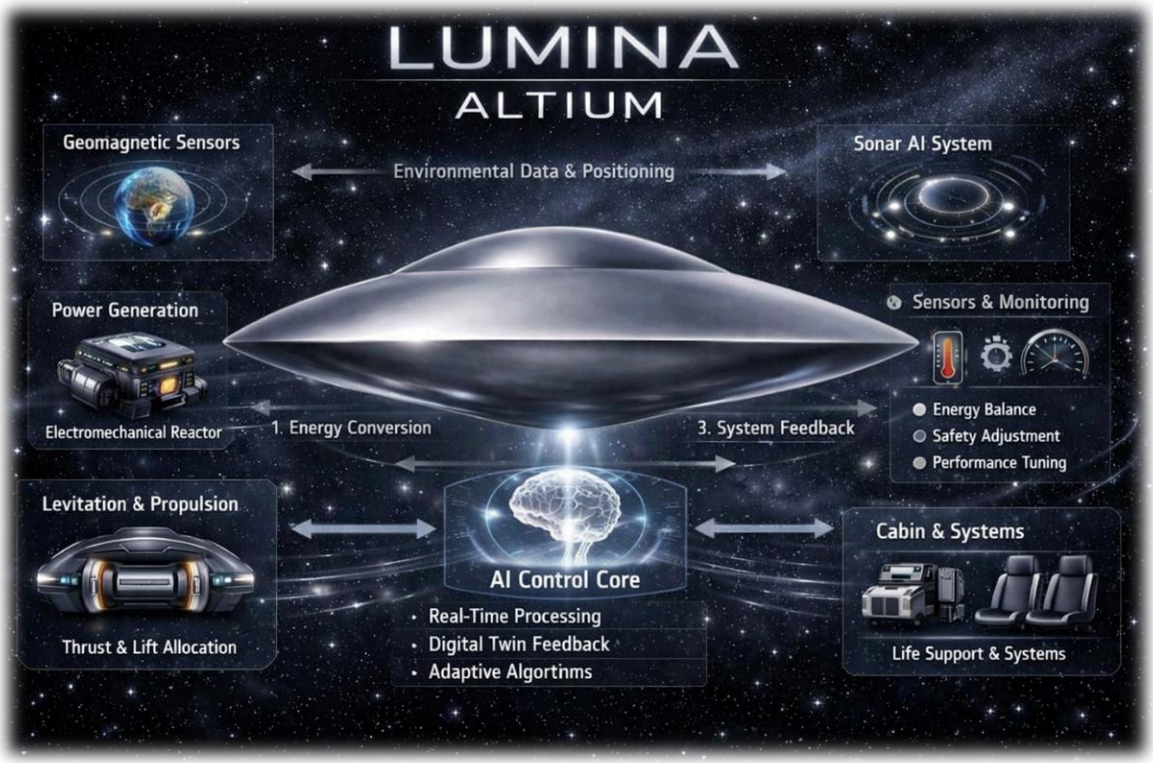
Life is good[O]



Lumina Altium is a next-generation space capsule designed for sustainable and autonomous travel. Unlike traditional rockets, Lumina uses electromagnetic levitation and advanced cooling to power an electric system. Inside, a holographic cabin is controlled by an AI core that manages life support, navigation, and safety in real time.

Lumina is a vision of clean, intelligent, and ergonomic mobility that redefines how humans can move on Earth and beyond. – Carlos Daniel Borrego Romero
